DETAILED ACTION

Finality is withdrawn. All prior rejections are obviated through amendment.

New art is presented below.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this

Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 10-12, 14-17, 20-21, 24-27 and 29-30 are rejected under 35

U.S.C. 102(b) as being anticipated by Chamness (4,256,113).

Chamness discloses a treatment apparatus with a loop (36) that anticipates that claimed by the Applicant.

Claims 10-12, 14-17, 20-21, 24-27 and 29-30 are rejected under 35

U.S.C. 102(b) as being anticipated by Ohno (4,840,176).

Ohno discloses a treatment apparatus with a loop (40, figure 6) that anticipates that claimed by the Applicant.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3739

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 13 and 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chamness.

Bending the end of the treatment apparatus is a mere design choice/shape change. See MPEP § 2144.04 IV.

B. Changes in Shape

In re Dailey, 357 F.2d 669, 149 USPQ 47 (CCPA 1966) (The court held that the configuration of the claimed disposable plastic nursing container was a matter of choice which a person of ordinary skill in the art would have found obvious absent persuasive evidence that the particular configuration of the claimed container was significant.).

Claims 13 and 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ohno.

Bending the end of the treatment apparatus is a mere design choice/shape change. See MPEP § 2144.04 IV.

B. Changes in Shape

In re Dailey, 357 F.2d 669, 149 USPQ 47 (CCPA 1966) (The court held that the configuration of the claimed disposable plastic nursing container was a matter of choice which a person of ordinary skill in the art would have found obvious absent persuasive evidence that the particular configuration of the claimed container was significant.).
